## **DETAILED ACTION**

### ***Drawings***

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because figure 2 does not give a detailed description of the numbered items. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

### ***Allowable Subject Matter***

2. Claims 1-18 are allowed.

3. The following is an examiner's statement of reasons for allowance: Prior art fails to disclose or render obvious a method for allowing a user to use a radiotelephone terminal as a remote control for an automatic device providing one or more pay services.

The closest prior art of record, Jensen, U.S. Patent No. 6,360,141, discloses a system for establishing automatic access to fuel upright and method for filling up of a vehicle. Jensen further discloses wherein a user/customer of the system can access a gas pump via a mobile telephone device wherein the user/customer enters various codes (control numbers) into the mobile device. One of the codes enters represents the selected service station and the specific pump the user/customer wants to use (col. 5, lines 1-38).

Art Unit: 2617

Jensen, however, fails to disclose receiving a call from a user without opening a telephone line by a central server, by using identification means and a memory of the central server to identify and store the control number and the ID number of a terminal, followed by an end-of-communications step using means for hanging up without opening the line allowing the central server to hang up without having opened the line.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
